

Open to the Public Investing, Inc. Dividend Reinvestments

Dividend reinvestment is available on all equity securities held at Public. Dividend reinvestment may lead to the customer accumulating fraction shares. While Public offers service for fractional shares, there are certain stocks that cannot be traded fractionally. In the event that you have fractional shares from dividends that cannot be sold via the app, please contact Customer Service at support@public.com or via the in-app chat.

Any fractional shares from dividends will be sold for you at no cost. Please bear in mind that fractional share sell orders for dividend reinvestment are processed at the closing price from the previous day's trading based on when Public receives your order. There may be times, due to volume, that your fractional sale order may not be completed until the next day.
